

CFMU Deployment & Testing

'Switch 1' = CFMU Ops acceptance of 'Old' & 'New', output of "Old only" or 'Old + New' (ENV attribute)

'Switch 2' = CFMU Ops acceptance of 'New' only, output of "Old only" or 'New only' (ENV attribute)

'Switch 3' = CFMU Ops acceptance of 'New' only, output of 'New' only

Transition for CFMU States - Translation

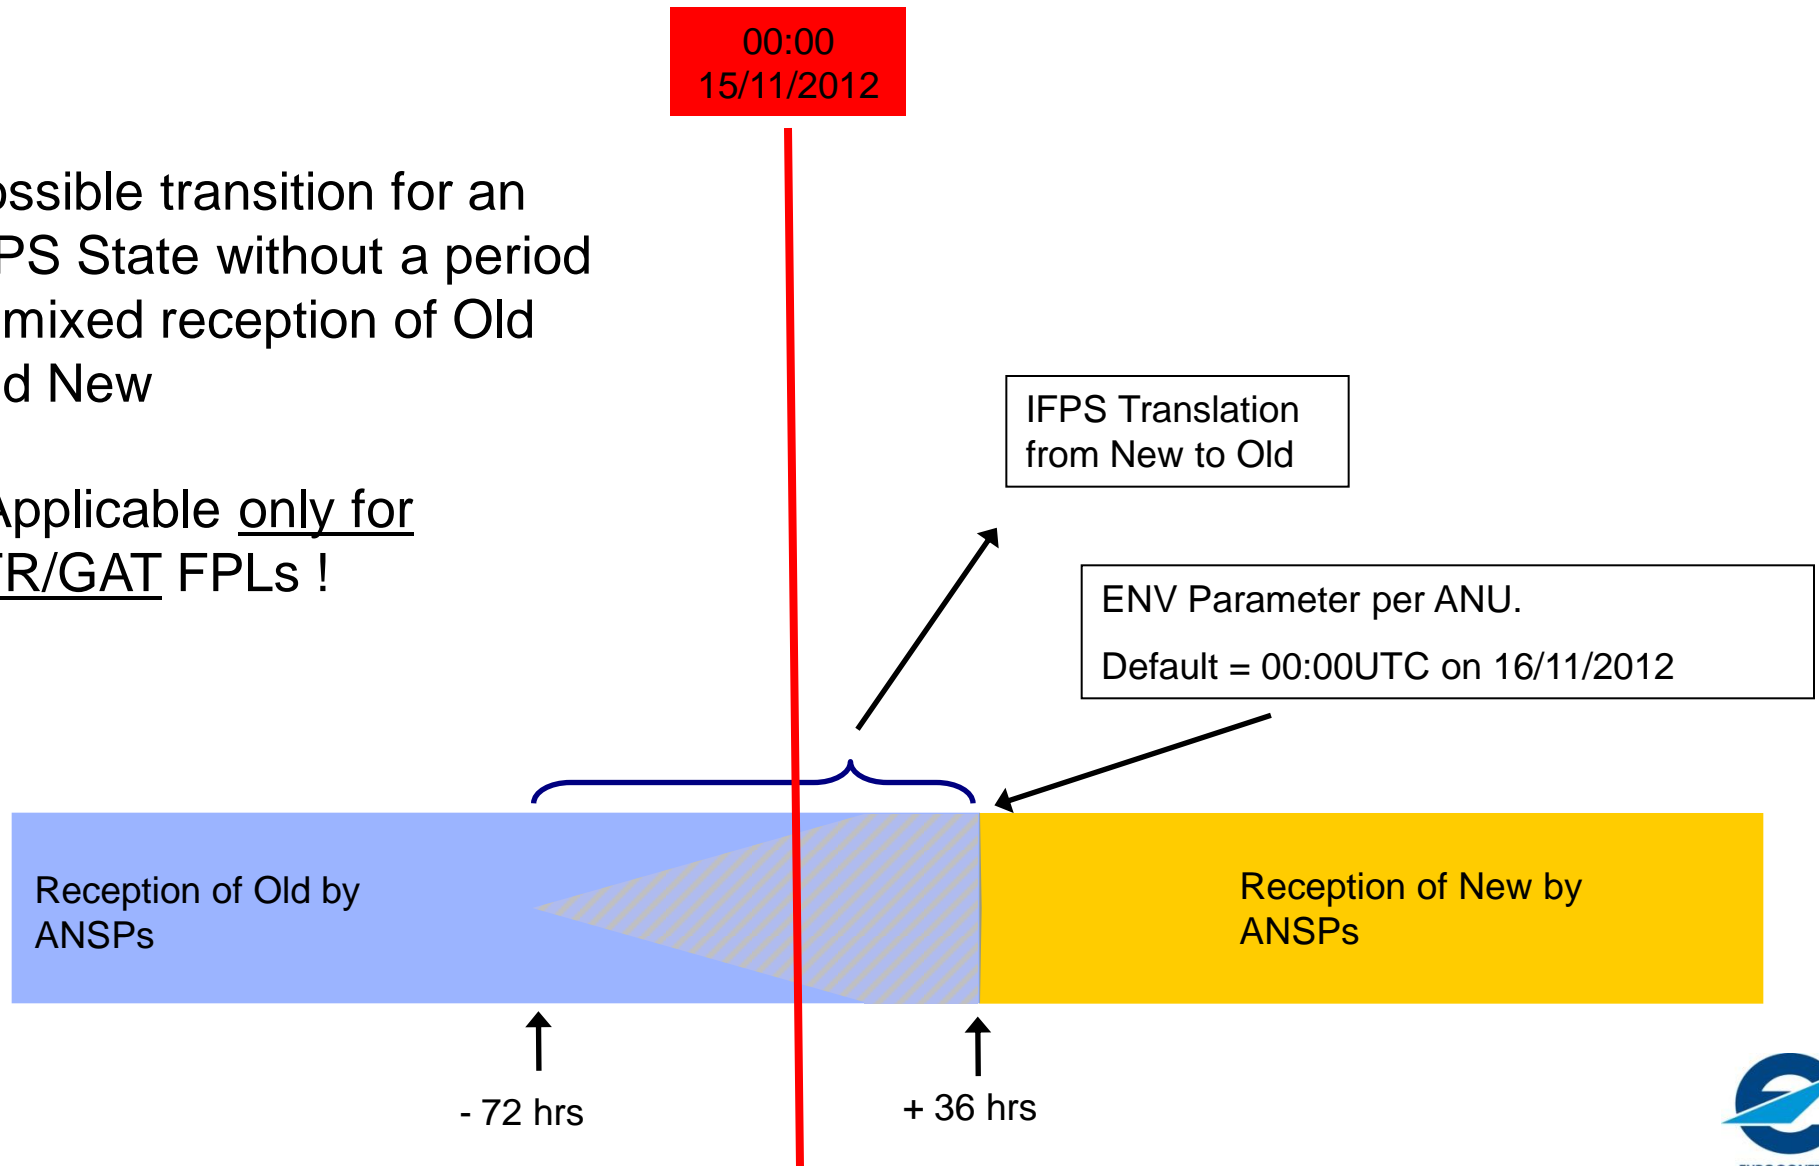

- **IFPS will implement the ability to translate from New to Old**
 - Ahead of 15/11 to assist in achieving a smooth transition and to assist AO migration
 - After 15/11 to provide a mitigation against ANSP switchover difficulties, a contingency measure
- **IFPS will implement modifications to enable an ATC Unit to achieve a clean switch from Old to New after 15/11 i.e. no period of mixed Old and New**
 - using a '2012' date/time parameter per unit with default setting of 12:00UTC on 16 Nov.

Transition – IFPS ANSPs

Possible transition for an IFPS State without a period of mixed reception of Old and New

*Applicable only for IFR/GAT FPLs !

Guidance for Aircraft Operators & FPL Originators

- **IFPS will not accept FPLs with EOBT more than 24hrs in advance during the period 12-15 Nov 2012**
- **FPLs with EOBT on 15 Nov should be filed in New format even if submitted prior to midnight. If necessary the AO should wait until after midnight to submit the FPL**
- **RPLs for the Winter 2012/13 season should be filed in New format**
